Other: Multithreading (GCD), Debugging, **App Store Submission**, Performance Optimization , Cross-functional collaboration, Agile/Scrum teamwork, sprint planning, code reviews, mentoring, stakeholder communication

PROFESSIONAL EXPERIENCE

Digitt Plus | Lahore, Pakistan | Aug 2023 – Present

Senior Mobile App Developer (Aug 2024 – Present)
Senior iOS App Developer / Consultant (Aug 2023 – Aug 2024)

Started as a consultant supporting fintech mobile architecture and delivery; converted to a full-time Senior Mobile App Developer role in Aug 2024 based on strong delivery impact, now leading iOS development for the platform.

- Lead iOS development for **Digitt Plus, a Pakistan-based fintech platform**, building secure and scalable digital financial products for **individuals, farmers, and businesses**
- Architected and integrated secure payment capabilities including **IBFT, bill payments, QR payments, and wallet-to-wallet transfers**
- Implemented **RSA encryption** and secure key handling using **CryptoSwift**, strengthening protection of sensitive financial data
- Integrated biometric authentication for secure application access and transaction authorization
- Integrated **third-party financial** and identity verification services including **NADRA, Raast Payments, and 1LINK**
- Enhanced application performance through multi-threading, API-handling and network-flow optimizations
- Implemented Firebase Cloud Messaging **(FCM)** for transactional alerts and real-time user notifications

Consultant Phase Highlights (Aug 2023 – Aug 2024):

- Consulted on **fintech mobile application** architecture, feature delivery, security, and third-party service integrations
- Designed a user-friendly real-time financial tracking dashboard, improving user satisfaction **scores by 20%**
- Delivered payment acceptance workflows, IBFT integration, bill payments, card management and merchant onboarding features
- Integrated and **secured digital wallet services** for employee-focused financial solutions

Products & Impact:

- **MyPerfectPay**— **20K+ downloads**: Secure all-in-one digital wallet and payroll solution enabling seamless salary disbursement, instant access to funds, and simplified financial management
- **Digitt+ — 30K+ downloads:** is a secure, all-in-one fintech wallet offering seamless payments, instant transfers, bill payments and tailored solutions for individuals, farmers, and businesses.

Senior iOS Developer | American Telephysicians| Lahore, Pakistan | Jul 2019 – Jul 2024

• Developed and launched 4+ iOS applications for **American TelePhysicians, a U.S.-based healthcare technology company**, supporting **virtual healthcare, telemedicine, and remote patient monitoring solutions** serving healthcare providers and patients in the **United States**.
• Implemented advanced security, code quality controls, and regular tech upgrades, reducing **crash rates by 50%**
• Implemented real-time communication features including **Video consultations, Zoho Chat, and in-app messaging**.
• Streamlined **healthcare order processing workflows** and integrated third-party chat systems, contributing to a **25%** increase in in-app engagement.

• Orchestrated **Remote Patient Monitoring** with Bluetooth and cellular devices, enabling accurate real-time tracking of vitals for **5K+ users**
• Applied secure data-transmission practices and maintained application security standards.
• Delivered all projects on time, meeting or exceeding client expectations under aggressive deadlines.
• Used Git for version control, collaboration and code management across development teams.

Products & Impact:
Shifa4U - Healthcare Services — 30K+ downloads: Developed a user-friendly iOS app to book lab tests, imaging services and doctor consultations nationwide.
CURA4U — 30K+ downloads: Built a comprehensive healthcare platform offering telemedicine, appointments, and e-pharmacy features for patients across the US.
SmartClinix Patients — 10K+ downloads: Created a telehealth app enabling patients to connect with doctors, manage health records, and schedule virtual visits.
SmartClinix For Physicians: — 10K+ downloads: Designed an intuitive app for doctors to manage appointments, consult patients online, and access EMR tools.
SmartClinix360: — 40K+ downloads: Led development of a modern app providing a unified healthcare dashboard for both patients and providers.

iOS Developer | Finja Pvt Ltd | Lahore, Pakistan | January 2019 – June 2019

• Contributed to **Finja's digital financial ecosystem**, developing iOS solutions focused on digital wallets, cashless payments, and accessible financial services in Pakistan.
• Worked on application architecture, design patterns, API integration, and production-quality iOS development.
• Collaborated with backend developers, designers, and cross-functional team members to deliver well-architected mobile solutions.
• Developed interfaces using Interface Builder and Storyboards.

Products:

- **SimSim Pakistan — 50K+ downloads:** Digital wallet and cashless payment application designed to provide convenient digital financial transactions and mobile-based financial services.

EDUCATION

Bachelor Of Computer Science | 2015 - 2019
Superior University | Lahore , Pakistan

Gained strong foundations in programming, algorithms, and system design, with practical exposure to software development lifecycle.
Final Year Project: National anthem Application — iOS/Android app for offline playback of the national anthem with synchronized lyrics display, built using Swift and Java.

PROJECT

- **HUBPAY Pakistan (Fintech Application):** Developed a secure digital payment platform enabling seamless fund transfers, bill payments, and financial transactions.
- **Click Halal (Food & Delivery Application):** Built a halal-focused food ordering and delivery app with real-time tracking and user-friendly ordering experience.
- **HWI Insurance (Insurance Application):** Created an insurance management app for policy tracking, claims processing, and customer support services.
- **First Cash and Carry (Shopping & Delivery Application):** Developed an e-commerce platform for browsing products, placing orders, and doorstep delivery services.
- **Gujrat Online Shopping (Shopping & Delivery Application):** Designed a local marketplace app enabling users to shop online with efficient order management and delivery.
- **Zaha Food (Shopping & Delivery Application):** Built a food ordering and delivery app with menu browsing, secure payments, and real-time order updates.
